Dear Hiring Manager,

Drawn to AWS Professional Services' mission to empower customers with transformative AI/ML solutions, I see a strong alignment with my experience in delivering end-to-end AI projects and driving significant business impact.

My background includes architecting an award-winning AI platform that reduced warranty costs by \$80 million, and implementing robust MLOps pipelines in AWS. I also increased model accuracy by 40% using LLMs for similarity analysis, directly addressing your need for professionals who can develop and deploy state-of-the-art AI solutions for novel challenges.

I am excited to bring these capabilities to AWS ProServe's customer-facing engagements. I look forward to discussing how my skills can contribute to achieving your objectives.

Sincerely,

Todd Takala
