Dear Hiring Manager,

Waymo's mission to build the world's most trusted driver deeply resonates with my passion for leveraging data to create robust, scalable solutions. I am eager to apply my expertise to advance your supply operations.

My experience building predictive models for equipment repair times, resulting in an \$80 million reduction in warranty costs, directly addresses your need for data-driven decision-making frameworks in supply operations. Furthermore, my work optimizing warehouse automation through advanced analytics and implementing MLOps pipelines demonstrates a proven ability to enhance operational efficiency and drive measurable business impact.

I am particularly drawn to Waymo's innovative approach to autonomous mobility and am excited to contribute my skills in operations research and optimization to your supply chain initiatives. I welcome the opportunity to discuss how my background can support Waymo's ambitious goals.

Sincerely,

Todd Takala
