Subject: Application for Data Scientist III (Ops & Fleet) Position

Dear Hiring Manager,

I am excited to apply for the Data Science Manager position at Avail (Realtor.com). With over a decade of experience leading data science, engineering, and analytics teams—and a proven record of delivering more than \$1.3 billion in business value through machine learning and end-to-end data product solutions—I am eager to bring my expertise in full-stack data science, stakeholder engagement, and strategic leadership to help Avail continue transforming the rental experience.

In my current role as Lead Data Scientist at Caterpillar, I architected and deployed an award-winning AI platform that reduced warranty costs by \$80 million, earning a CEO Award for its impact. I have extensive experience guiding projects from inception through deployment, including KPI definition, stakeholder communication, and scalable MLOps pipelines in AWS and Snowflake. By leveraging advanced ML techniques—such as anomaly detection, LLM-driven feature engineering, and deep learning models—I've consistently improved prediction accuracy and delivered actionable insights to senior leadership. Best regards,

Todd Takala
