Subject: Data Science Manager, Supply

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Data Science Manager, Supply, position at Lime. With a proven track record of leveraging advanced analytics and machine learning to enhance operational efficiency and drive significant value, my experience aligns perfectly with the responsibilities outlined in your job description. The opportunity to contribute to Lime's mission of creating a shared, affordable, and carbon-free future for transportation is incredibly compelling.

In my recent roles as a Lead Data Scientist at Caterpillar and a Reliability Analytics Manager at Amazon, I focused on solving complex problems using data. At Caterpillar, I developed an AI system that cut warranty costs by \$80 million, earning a CEO Award. This role demanded expertise in machine learning, A/B testing, and statistical inference, skills essential for your position. My experience with MLOps pipelines using AWS SageMaker and Snowflake aligns with your need for ML infrastructure expertise.

My experience extends beyond data science to the core principles of data science. At Empire-Cat, I led a team that achieved and maintained 90% physical availability for a legacy fleet of 250 haul trucks, cutting client operating costs by \$1.2B over six years. My certifications, including Lean 6 Sigma Green Belt, further demonstrate my commitment to continuous improvement and data-driven problem solving.

The job description mentions a focus on demand forecasting, vehicle positioning, and optimization. Throughout my career, I have applied time series forecasting models like ARIMA and SVM, and have deep expertise in machine learning and optimization. My work in a manufacturing and supply chain environment has given me direct experience with the kinds of spatial-temporal demand forecasting and routing problems that are central to your operations.

My passion for using data science to drive strategic initiatives, combined with my extensive experience in leadership and analytics, makes me a strong candidate for this position. I am eager to discuss how my skills can contribute to the success of your Supply team and help Lime continue to set the pace for shared micromobility globally.

Thank you for your time and consideration. I look forward to hearing from you.

Best regards,

Todd Takala
