Subject: Data Science Manager

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Data Science Manager position at Toyota Financial Services. With a proven track record of leading teams to develop and deploy machine learning solutions that have delivered over a billion dollars in value, I am confident that my technical leadership and strategic business partnership skills align perfectly with the objectives of this role.

In my current position as Lead Data Scientist at Caterpillar, I spearheaded the development of an AI-based system to predict equipment repair times, directly resulting in an \$80 million reduction in warranty costs in its first year. This project showcases my ability to manage the end-to-end data science lifecycle, from conceptualization to deployment. I led my team in building robust MLOps pipelines using Python, Snowflake, and a suite of AWS tools, including SageMaker and Step Functions, which directly corresponds to the technical leadership qualifications and cloud platform expertise you are seeking.

The role at TFS emphasizes a blend of hands-on technical guidance and strategic team management. I have successfully balanced these responsibilities by not only setting high standards for code quality and architectural best practices but also by mentoring high-performing data scientists. I have extensive experience translating complex analytical findings into actionable strategies for senior leadership and non-technical stakeholders, a skill I honed while presenting a new design-for-reliability benchmark to executives at Amazon and while leading client-facing problem-solving for a \$1.2B cost-saving initiative at Empire-Cat.

My background in reliability and fleet analytics has provided me with a deep understanding of the challenges and opportunities inherent in managing large-scale, high-value assets. I am excited by the prospect of applying this experience to the innovative mobility and financial solutions being developed at Toyota. I am eager to contribute to your team's success and help drive the next wave of data-driven innovation at TFS.

Thank you for considering my application. I have attached my resume for your review and look forward to discussing how my skills and experience can benefit Toyota Financial Services.

Best regards,

Todd Takala
