Subject: Senior Manager, Fleet Services Engineering

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Senior Manager, Fleet Services Engineering position at Walmart, as advertised on LinkedIn. With a strong background in reliability engineering, data analytics, and team leadership, I am confident that my experience aligns perfectly with the needs of your Next Gen Transportation Engineering and Maintenance team.

The job description's emphasis on leveraging technology and data to optimize the efficiency of a large private fleet resonates deeply with my professional history. In my most recent role as a Lead Data Scientist at Caterpillar, I led the development of an AI-based system that reduced warranty costs by \$80M in 2024. This project, which earned a CEO Award, involved applying machine learning algorithms to extensive service data, showcasing my ability to deliver significant value through data-driven innovation. Similarly, at Amazon Robotics, I developed highly accurate regression and recommendation systems and led an effort to establish a new design-for-reliability benchmark by analyzing over 2 petabytes of IoT data.

My experience extends beyond data science to the core principles of fleet management and operational excellence. At Empire-Cat, I led a team that achieved and maintained 90% physical availability for a legacy fleet of 250 haul trucks, cutting client operating costs by \$1.2B over six years. This was accomplished by resolving critical design issues and applying methods like ARIMA and SVM for time series forecasting to optimize the remanufacturing supply chain. My certifications, including Lean 6 Sigma Green Belt, further demonstrate my commitment to continuous improvement and data-driven problem-solving.

I am also skilled in influential communication and collaboration, which are critical for this role. Throughout my career, I have translated complex technical and mathematical concepts into clear, actionable insights for both technical teams and non-technical stakeholders, ensuring project success and fostering strong partnerships. The opportunity to contribute to Walmart's goal of zero emissions and innovate for the future of supply chain is an exciting prospect, and I am eager to apply my skills to such a purposeful challenge.

Thank you for your time and consideration. I have attached my resume for your review and look forward to the possibility of discussing this exciting opportunity with you.

Best regards,

Todd Takala
